

Meet the 60 Liter Stove

The 60 Liter Stove is a serious cooking machine designed around an extra large (approximately 15 gallon) cook pot. Its high capacity makes it perfect for commercial scale cooking, whether a restaurant, a school, a crab cookout, or a huge tailgate party. This stove will boil ten gallons of water in less than 30 minutes, and continue to boil with just a few small sticks of wood. It is unparalleled in quick cooking times, reduced fuel use, and minimal smoke and greenhouse gas emissions.

Performance

This chart shows the fuel use, emissions, and cook time of the 60 Liter Stove compared to an open fire.
