

USING A POT SKIRT

WITH A **STOVETEC**

STOVE **SAVES FUEL,**

REDUCES

COOKING TIME AND

DECREASES

EMISSIONS

Tests conclude that **USING A POT SKIRT** with a StoveTec Stove **saves an additional 10 percent of fuel, reduces cooking time by an additional 5 minutes, and decreases emissions by an additional 20 percent** compared to cooking **WITHOUT A POT SKIRT.**

SKIRTS ARE EASY TO USE

Every pot skirt is made to easily adjust and fit around a wide variety of different sized pots.

SKIRTS DIRECT HEAT

Pot skirts focus the heat towards the bottom and sides of the pot, increasing the efficiency of the stove.

www.stovetec.net

This means cooks can reduce fuel use by 50 percent, save over 10 minutes of cooking time, and reduce the harmful emissions they breathe by 75 percent using a StoveTec Stove with a pot skirt compared to cooking over an open fire or with an unimproved cook stove.
